Table 1: Duration of each category in the proposed train-validation-test split of the AndyLab dataset in seconds. The train data comprises participants 909, 2275, 3327, 5124, 5319, 5521, and 9266, the validation data participants 8410, 8524, and 9875 and the test data participants 541, 2193, and 5535. The "N/A" category comprises observations where all annotators gave different labels.

(a) General Posture								
	N/A	Standing	Walking	Kneeling	Crouching	Sitting	Lying	
Train	15	7675	3401	163	1208	0	0	
Validation	2	2984	1354	0	408	0	0	
Test	2	2962	1237	3	430	0	0	

(b) Detailed Posture								
	N/A	Upright	Bent	Forward	Bent	Str. Forward	Shoulder	Level Overhead
Train	19	7462		1735		1965	512	769
Validation	9	2849		646		811	94	338
Test	7	2758		673		750	220	226

(c) Goal-oriented Action											
	N/A	Reach	Pick	Place	Release	Carry	Fine	Manipulation	Screw	Idle	
Train	106	767	491	832	678	1075		4333	968	3214	
Validation	23	290	186	320	286	483		1503	360	1297	
Test	48	274	190	295	259	340		1600	415	1213	

Table 2: Weights used to calculate the weighted average of F1-scores (w-F1) on test data of both LARa datasets. All values are given in percent.

Dataset	Legs			Upper Body				Torso Rotation	Arms			Item Pose					
	Gait Cycle	Step	Standing Still	Upwards	Centered	Downwards	No Motion		Right Hand	Left Hand	No Hand	Bulky Unit	Handy Unit	Utility	Cart	Computer	No Item
LARa-IMU	5.09	9.54	6.63	2.06	13.2	1.08	4.91	0.17	17.9	14.8	3.28	4.89	7.45	3.24	2.72	0.90	2.06
LARa-MoCap	5.03	9.51	6.69	2.32	13.0	1.01	4.88	0.17	18.0	14.7	3.41	4.62	7.51	3.24	2.83	0.89	2.14
